Hi Jack,

Thanks for attending our meeting last night. Here's the map I referenced last week. The closest home to the operation is approximately 1200 feet. Please let me know if you have any additional questions.

Kristina

Jack,

The homes that are 1,100 feet away from the proposed composting operation are to the west in San Juan Capistrano and are separated by a ridgeline. The proposed composting operation will be located approximately 2,580 feet away from the closest homes in Rancho San Juan (i.e., not the closest proximity).

We are having some issues with our computer drives this week. Once the issue is resolved (hopefully next week), I will send you an exhibit that provides more detail on this issue.

Thanks,
Kristina

Thank you. Main question I have now is: why (given the total layout of the dump, is it proposed to place is operation in the absolute closest proximity to expensive homes? Thank you
Jack

Good Morning,

Please visit our website for more information about the project, including a map of the location (Figure 1).

Kristina

The flyer we received indicates that the new operation will be 1100 ft from homes.

Could you send me a map indicated the exact location, within Prima Descheca?

Thank you
